EDUCATION

McGill University, Montreal, Quebec.
Master of Science (Applied), Speech-Language Pathology. November 1994.

McGill University, Montreal, Quebec.
Bachelor of Arts, Psychology. October 1991.

PROFESSIONAL EXPERIENCE

Clinical Coordinator/Speech-Language Pathologist
Northeastern University, Department of Speech-Language Pathology & Audiology,
Boston, MA. (January 2013 – Present).

Ongoing establishment of new clinical affiliations between Northeastern's Department of SLPA and local & out-of-state clinical sites for off-campus supervised clinical practica for graduate clinicians in the MS program (specialty in medical settings with the adult population). Coordination of external clinical site placements for each academic session, including student guidance/preparation/supervision as well as the provision of support and resources for off-campus clinical supervisors. Serving as liaison through each semester for both student and supervisor through frequent contact which includes in-person site visits. Performing supervisory, consultative and administrative duties related to maintaining and growing relationships with external clinical placement sites and SLP supervisors. Ongoing management, coordination and resource for external clinical placement colleagues. Facilitation/co-teaching of Advanced Clinical Seminar as well as coordination of guest speakers specializing in adult medical SLP and PT/OT.

Speech-Language Pathologist
Harold Goodglass Aphasia Research Center, Jamaica Plain, MA. (September 2007-December 2012).

In charge of outreach and recruitment of adults with acquired brain injury (stroke & TBI) or progressive conditions to participate in a variety of research studies focused on communication impairment. Responsibilities include screening/evaluating and consenting potential participants and determining their eligibility for research projects as well as for Aphasia/Neurobehavior Rounds. Established and maintained collaborative affiliations and co-referral systems with a variety of clinical and academic healthcare professionals, hospitals and rehabilitation facilities, research centers and graduate school clinics. Frequently involved in speaking engagements at stroke/aphasia support groups as well as inservices at speech-language pathology departments throughout the Boston area. Additional responsibilities include assessment/treatment in Dr. Margaret Naeser's study examining the effects of Transcranial Magnetic Stimulation combined with Constraint-Induced Language Therapy on individuals with chronic aphasia.

Speech-Language Pathologist

Brigham & Women's Faulkner Hospital, Jamaica Plain, MA. (October 2000-December 2001).

Independently managed speech pathology caseload in acute care facility. Responsible for evaluation and treatment of communication disorders and dysphagia for an adult inpatient/outpatient population. Participated in team meetings to plan appropriately for post-acute rehabilitation and provided initial education and guidance to patients and their families. Provided frequent inservices to nursing aides on speech, language and swallowing disorders.

Senior Speech-Language Pathologist/Clinical Education Coordinator

Burke Rehabilitation Hospital, White Plains, NY. (October 1998-June 2000).

Senior clinician for inpatients/outpatients with acquired speech, language, cognitive-communicative and swallowing disorders. Responsibilities included assessment and treatment, patient/family education and counseling, patient screening and caseload assignment, supervision/administration of clinicians on the stroke unit, active participation in interdisciplinary patient care meetings, rehabilitation technician training and departmental and unit-based inservicing. Responsibilities also included establishing and strengthening relationships with local graduate schools, interviewing potential students and selecting/supervising graduate clinicians for field internship.

Speech-Language Pathologist/ Clinical Fellow

Braintree Rehabilitation Hospital, Braintree, MA. (July 1995-August 1998).

Speech-Language Pathologist for patients with neurogenic communication disorders and dysphagia. Responsibilities included conducting evaluations and implementing treatment via individual and group sessions, primarily for inpatients on the stroke and TBI units. Experience with community-based therapy programs aimed at maximizing functional gain and facilitating transition to home environment. Attended and participated regularly in medicine and neurology rounds, as well as Aphasia Grand Rounds. Supervised and trained graduate students and speech technicians
