Overview of Advanced Fieldwork

Prerequisites
In order for students from the Northeastern University School Psychology Doctoral Program to be eligible to begin advanced fieldwork, they must complete the following milestones in the program:

- Successful completion of the pre-practicum and practicum
- Successful completion of the MTEL
- Successful completion of all first and second year coursework
- Satisfactory ratings on Baseline Competencies (see below).

Field Supervision
Supervision and mentoring during both years of advanced fieldwork should be provided by a licensed psychologist. Additionally, supervision and mentoring during the school-based experience in Year 4 should be provided by a licensed school psychologist with a minimum of three years of experience. Supervision consists of a minimum of two hour per week, in a face-to-face format.

University Supervision
Doctoral students are enrolled in an advanced fieldwork seminar course during both years of advanced fieldwork. A university supervisor, who is a certified school psychologist and a licensed psychologist, instructs this course. The university supervisor maintains contact with the field supervisor through at least two face-to-face site visits each year. At the end of the year, the field supervisor and university supervisor determine if the student has progressed adequately in the advanced fieldwork competency areas described in this document.

Comprehensive Case Studies
During the two years of advanced fieldwork, students will produce four case studies that illustrate their competencies. These case reports are:

- Comprehensive Psychoeducational Assessment
- Consultation: Academic Problem or Behavioral Problem
- Individual or Group Counseling Case
- Prevention/Promoting Learning School-Wide or Staff Professional Development

More details about the requirements of the case studies are available at the end of this document. Students’ case studies can become part of their comprehensive examination portfolio, described in the program handbook.

Documenting Fieldwork Hours
Students should keep detailed records of the AFW hours. Documentation of fieldwork hours is used in the internship application process. It is recommended that students use MyPsychTrack.com to log their hours. Field supervisors will also need to activate a
MyPsychTrack.com account to review students’ hours. At a minimum, supervisors should sign off on students’ hours on a monthly basis.

**Course Vouchers for Supervisors**
In recognition of the valuable guidance and supervision that is given to students, the Bouvé College of Health Sciences at Northeastern University makes available tuition vouchers for field supervisors. A voucher for one course at Northeastern University is available for each advanced fieldwork site. Northeastern University grants a voucher for one course to the *participating school system or agency*. It is necessary for the supervisor to make a written request, on the school systems’ (or agency’s) letterhead, to obtain the voucher. The request for a voucher should be addressed to:

Ms. Cherish Grant Dixon  
Department Applied Psychology  
404 International Village  
Northeastern University  
Boston, MA 02115

**Successful Completion of Advanced Fieldwork**
- Completion of 1200 hours of fieldwork  
- Passing score on school psychology Praxis exam  
- Completion of all advanced fieldwork paperwork/E*Value forms  
- Ratings at the “expected level” or higher on all competency areas from supervisor (The expected level varies by competency and is defined in the Advanced Fieldwork Competencies section below).  
- Completion of requirements in advanced fieldwork syllabus/Grade of Satisfactory (S) for all semesters in the advanced fieldwork course

**AFW by the Numbers:**
1. 1200 hours of supervised fieldwork (minimum. of 600 hours in a school setting)  
2. 2-hours/week of individual, face-to-face supervision  
3. 4 comprehensive case studies for the comprehensive exam portfolio (see below)*  
4. 4 assessment reports (minimum)*  
5. 3 team meeting presentations (minimum)*  
6. 3 counseling cases (minimum)*  
7. 3 consultation cases (minimum; at least 1 case involving family-school collaboration)*  
8. 4 face-to-face site visits (2/year)*  

*These requirements span the two years of AFW.
Searching for an AFW Site and Obtaining a Contract

Typically, students search for an advanced fieldwork site during their second year after meeting and consulting with their advisor and the Program Director about potential sites in the fall and reviewing the database of previously used and approved sites for the program within the E*Value system. Students are also encouraged to speak with other students who have already completed their fieldwork experience to gain information about sites they are considering. Former students of sites can be found in the E*Value system in the site information. Applicants should also discuss potential sites with their advisor and the Program Director. Prior to beginning advanced fieldwork, a contract between the site and the university needs to be completed. The contract request process (called a schedule request) needs to be initiated by the student through the E*Value system. Making this schedule request in E*Value initiates the contract process between the site and the Department. As soon as a student has decided on a site the schedule request should be made as the contract process can take several weeks.

Approval and Location of Advanced Fieldwork

The Program Director shall approve all advanced fieldwork placements. If a student makes an oral or written commitment to a site, he/she is ethically obligated to follow through and do his/her field experience at that site, regardless if a more attractive alternative becomes available at a later date. If a student wants to change a commitment to a field site, he/she needs written approval from the Program Director. During both fall and spring semesters of the advanced fieldwork years, all students will register for the 2-credit advanced fieldwork seminar course. All sites must be within a 50-mile radius of Boston.

Four University-Field Supervisor Contacts

During each year of advanced fieldwork, at least two formal, face-to-face contacts between the university supervisor, the field supervisor, and the graduate student will occur at the field site for the purpose of discussing the student's progress. There will be four face-to-face meetings across the two years of Advanced Fieldwork. There will also be one phone check in meeting at the mid-point of the experience. One of the face-to-face meetings occurs toward the beginning of the fall term and the other occurs toward the end of the spring term. After each meeting, the three parties put their initials on the MA DESE Initial License as a School Psychologist form that documents the occurrence of the meeting. In addition, university supervisors, field supervisors, and students will communicate via email and telephone on an ongoing basis to address needs as they arise. At the final meeting of AFW 4, the university supervisor and the field-based supervisor will determine whether or not the graduate student has attained the competency level needed to function independently as a school psychologist, apply for national certification in school psychology (NCSP) and move on to the pre-doctoral internship. If the student has not attained competency in one or more areas, the student might be required to complete additional advanced fieldwork experiences.
Resolving Advanced Fieldwork Problems
Although infrequent, problems and/or conflict can develop during the field experience. Therefore, it is important to have a fair and consistent method that can be utilized in a systematic manner for problem resolution. Either the supervisor or the supervisee can initiate action to resolve the perceived problem.

1. The first step is for the supervisor and supervisee to jointly discuss any emerging concerns in an open and honest fashion. Moreover, it is important that this be done in a timely manner. It also may be advantageous to document the outcomes of the meeting.

2. Should this first step be insufficient, the university supervisor should become involved to provide assistance. At that time, a plan will be developed by that contains specific goals that are agreed upon in writing by all three parties (i.e., the student, site supervisor, and the university supervisor). A date for a review of the plan will be specified.

3. If resolution/improvement does not occur within the temporal framework agreed upon, the university supervisor will notify the university’s Director of Clinical Training that concerns have been noted and will specify these concerns. The university’s Director of Clinical Training will be requested to mediate. At that time, previous concerns and plans to address the concerns will be reviewed. All parties will then agree upon additional specific, written plans and a timely follow-up review date will be established.

4. Finally, if problems continue, the core faculty of the school psychology program will meet to determine an appropriate course of action. Such actions may include changing supervisors, changing sites, repeating the fieldwork experience or the student’s termination from the program.
Minimum Requirements for Satisfactory Completion of Advanced Fieldwork

Advanced fieldwork is distinct from and occurs after the successful completion of the practicum experience. Satisfactory scores on all four comprehensive case reports across the two years are required for successful completion of advanced fieldwork. Collectively, these case reports provide students with an opportunity to demonstrate their performance with respect to APA competencies and the NASP training domains and Northeastern University’s training goals. Students also must pass the Praxis exam in school psychology in order to successfully complete the advanced fieldwork requirement. The director of the school psychology program must receive documentation of the overall and specific content Praxis scores before the end of the spring semester of the second year of the advanced fieldwork.

Students typically complete their advanced fieldwork 2-2.5 days per week totaling a minimum of 600 hours each year. A minimum of 600 of the 1200 advanced fieldwork hours must be completed in a school setting, under the field supervision of a doctoral level, Massachusetts licensed school psychologist. The non-school experience must be completed under the supervision of a Massachusetts licensed psychologist. In addition to tracking their hours electronically, students summarize these hours on the “The End of Year Advanced Fieldwork Form” (in E*Value). Students are expected to follow the calendar of the site where they are doing their advanced fieldwork placement. In the school setting, students are expected to remain in their placement until the end of their district’s academic year. The terms of the advanced fieldwork schedule should be determined as early as possible by the student and supervisor (ideally prior to the start of the advanced fieldwork experience) and should be articulated in the signed practicum contract (see below) between the university and the fieldwork site.

The expectation is that advanced fieldwork students will have attained sufficient knowledge and skills from their second year school-based practicum so that they can begin their advanced fieldwork experience with direct experiences in assessment, intervention, prevention, and consultation. The site supervisor in consultation with university supervisor and the graduate student will determine the student’s readiness for more advanced experiences. In order for graduate students to attain a satisfactory grade in the advanced fieldwork courses, they must demonstrate the expected level of competency (as defined below) across each of the following areas.

1. Relationship/Interpersonal Skills
2. Skills in Application of Research
3. Assessment Skills
4. Intervention Skills
5. Consultation Skills/Professional Collaborations
6. Diversity - Individual and Cultural Differences
7. Ethics and Law
8. Development of Leadership Skills
9. Supervisory Skills
10. Professional Development
11. Communication and Information Technology
Advanced Fieldwork Competencies

The competencies for advanced fieldwork experiences in Northeastern University’s doctoral program in school psychology were based on the Practicum Competencies Outline: A Reference for School Psychology Doctoral Programs (2010). The latter was adapted from the work developed by the Association of Directors of Psychology Training Clinics (ADPTC) and the Council of Chairs of Training Councils (CCTC) Practicum Competencies Workgroups. For additional background information see: Hatcher, R. L. & Lassiter, K. D. (2007). Initial training in professional psychology: The Practicum Competencies Outline. Training and Education in Professional Psychology, 1, 49-63.

It is expected that doctoral students will acquire competence in the core domains described below prior to beginning advanced field work and at the end of advanced fieldwork training, prior to beginning internship.

Important notes:

1. Psychology students should be adequately prepared to begin practicum. Before beginning advanced fieldwork the student should possess and demonstrate the following set of basic personal and intellectual skills, attitudes and values, and a core of professional knowledge. This core knowledge and these skills, attitudes and values are baseline competencies of the professional psychologist. During advanced fieldwork students will refine these baseline skills into professional skills.

Baseline Competencies

<table>
<thead>
<tr>
<th>1. Personality Characteristics, Intellectual and Personal Skills</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) <strong>Interpersonal skills</strong>: ability to listen and be empathic with others; respect for/interest in others’ cultures, experiences, values, points of view, goals and desires, fears, etc. These skills include verbal as well as non-verbal domains. An interpersonal skill of special relevance is the ability to be open to feedback.</td>
</tr>
<tr>
<td>b) <strong>Cognitive skills</strong>: problem-solving ability, critical thinking, organized reasoning, intellectual curiosity and flexibility.</td>
</tr>
<tr>
<td>c) <strong>Affective skills</strong>: affect tolerance; tolerance/understanding of interpersonal conflict; tolerance of ambiguity and uncertainty.</td>
</tr>
<tr>
<td>d) <strong>Personality/Attitudes</strong>: desire to help others; openness to new ideas; honesty/integrity/valueing of ethical behavior; personal courage.</td>
</tr>
<tr>
<td>e) <strong>Expressive skills</strong>: ability to communicate one’s ideas, feelings and information in verbal, non-verbal and written forms.</td>
</tr>
<tr>
<td>f) <strong>Reflective skills</strong>: ability to examine and consider one’s own motives, attitudes, behaviors and one’s effect on others.</td>
</tr>
<tr>
<td>g) <strong>Personal skills</strong>: personal organization, personal hygiene, appropriate dress.</td>
</tr>
</tbody>
</table>

2. Knowledge from classroom experience:

The practicum experience will engage and develop skills and knowledge that have been
the focus of coursework before advanced fieldwork. Prior to advanced fieldwork, students should have acquired basic theoretical and research knowledge related to diagnosis, assessment, and intervention; diversity; ethics; skills in seeking out and applying research knowledge in the applied setting. Practicum students should possess sufficient mastery of basic information and skills to prepare them to make good use of the advanced fieldwork experience. Coursework in the first two years of the program should provide sufficient training in the following specific areas:

**a) Assessment & Clinical Interviewing**

i) Knowledge regarding psychopathology related to the population(s) served by the practicum sites.

ii) Knowledge of scientific, theoretical, empirical and contextual bases of psychological assessment.

iii) Knowledge of test construction, validity, score reliability and related assessment psychometrics.

iv) Training in principles and practice of systematic administration, data-gathering and interpretation for assessment, including identifying problems, formulating goals and case conceptualizations; understanding the relationship between assessment and intervention, assessment of treatment progress and outcome.

v) Training in the models and techniques of clinical interviewing.

**b) Intervention**

i) Knowledge of scientific, theoretical, empirical and contextual bases of intervention.

ii) Training in basic clinical skills, such as empathic listening and framing problems.

iii) Training in assessment of intervention progress and outcome.

**c) Ethical & Legal**

i) Principles of ethical practice and decision making (APA, 2002)

ii) Legal knowledge related to the practice of school psychology

**d) Individual and Cultural Difference (ICD)**

i) Knowledge and understanding of the principles and findings related to ICD as they apply to professional psychology.

ii) Understanding of one’s own situation (e.g., one’s ethnic/racial, socioeconomic, gender, sexual orientation; one’s attitudes towards diverse others) relative to the dimensions of ICD (e.g., class, race, physical disability etc.).

iii) Understanding of the need to consider ICD issues in all aspects of professional psychology work (e.g., assessment, treatment, research, relationships with colleagues).

2. Competencies are acquired at different rates. Some competencies, such as administrative or supervisory skills, may come slowly and later in professional development. Other more basic competencies, such as timeliness, ability to utilize supervision, etc., may be expected and/or required to be substantially attained very early in training. These differences in the rate of development are reflected in the level of competence expected at the conclusion of practicum training.
3. One of the most widely used schemes for describing the development of competence is that of Dreyfus and Dreyfus (1986), who define five stages, from Novice to Advanced Beginner to Competent to Proficient to Expert. The overall idea is that as the learner becomes more and more familiar with the analytic and action tasks of the field, performance becomes more integrated, flexible, efficient and skilled. Patterns and actions that have to be carefully thought about and/or taught by supervisors become internalized and increasingly automatic.

4. Note that “competency” refers to a skill domain (e.g., assessment); “competence” or “level of competence” refers to the level of skill an individual has acquired (e.g., intermediate level of competence in assessment); and “competent” is a description of a particular level of skill (e.g., this psychologist is competent in neuropsychological assessment).

5. Defining levels of competence. The following categories are utilized to describe the level of competence expected at the conclusion of advanced fieldwork. In some areas, substantial competence is expected, while in others, just the beginning of understanding is expected – a student, or any psychologist for that matter, may be expert in some areas and a novice in others.

   **A. Novice:** Novices have limited knowledge and understanding of (a) how to analyze problems and of (b) intervention skills and the processes and techniques of implementing them. Novices do not yet recognize patterns, and do not differentiate well between important and unimportant details; they do not have filled-in cognitive maps of how, for example, a given client may move from where he/she is to a place of better functioning.

   **B. Intermediate:** Psychology students at the intermediate level of competence have gained enough experience through practice, supervision and instruction to be able to recognize some important recurring domain features and to select appropriate strategies to address the issue at hand. Surface level analyses of the Novice stage are less prominent, but generalization of diagnostic and intervention skills to new situations and clients is limited, and support is needed to guide performance.

   **C. Advanced.** At this level, the student has gained deeper, more integrated knowledge of the competency domain in question, including appropriate knowledge of scholarly/research literature as needed. The student is considerably more fluent in his/her ability to recognize important recurring domain features and to select appropriate strategies to address the issue at hand. In relation to clinical work, recognition of overall patterns, of a set of possible diagnoses and/or treatment processes and outcomes for a given case, are taking shape. Overall plans, based on the more integrated knowledge base and identification of domain features are clearer and more influential in guiding action. At this level, the student is less flexible in these areas than the proficient psychologist [the next level of competence] but does have a feeling of mastery and the ability to cope with and manage many contingencies of clinical work.

6. Individual and Cultural Differences. A core principle behind all competencies listed in this document is awareness of, respect for, and appropriate action related to individual and cultural difference (ICD). Issues of ICD are relevant to each of the competencies described, but take a particularly large role in some. In these instances, ICD is mentioned specifically.
Description of Skills Leading to Competencies that Are Developed During the Advanced Fieldwork Experience

The end of semester evaluation that is completed by the field supervisor is based on the framework below. Field supervisors complete the student evaluation twice—at the end of the fall and spring semesters—through E*Value.

1. Relationship/Interpersonal Skills
The ability to form and maintain productive relationships with others is a cornerstone of professional psychology. Productive relationships are respectful, supportive, professional and ethical. Professional psychologists should possess these basic competencies when they first begin their clinical training. Although the ability to form such relationships is grounded in basic skills that most students will have developed over the course of their lives to date, helping the student hone and refine these abilities into professional competencies in the applied setting is a key aim of advanced fieldwork. In particular, the advanced fieldwork seeks to enhance students’ skills in forming relationships:

<table>
<thead>
<tr>
<th>Competency</th>
<th>Expected level by the end of AFW</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>With children/families:</strong></td>
<td></td>
</tr>
<tr>
<td>a) Ability to take a respectful, helpful professional approach to patients/clients/families.</td>
<td>Advanced</td>
</tr>
<tr>
<td>b) Ability to demonstrate empathy by being aware of, understanding, and appreciating the feelings of others</td>
<td>Advanced</td>
</tr>
<tr>
<td>c) Ability to form a working alliance and gain trust of those being served.</td>
<td>Intermediate</td>
</tr>
<tr>
<td>d) Ability to deal with conflict, negotiate differences.</td>
<td>Intermediate</td>
</tr>
<tr>
<td>e) Ability to understand and maintain appropriate professional boundaries.</td>
<td>Intermediate</td>
</tr>
<tr>
<td><strong>With colleagues:</strong></td>
<td></td>
</tr>
<tr>
<td>a) Ability to work collegially with fellow professionals at the practice site.</td>
<td>Advanced</td>
</tr>
<tr>
<td>b) Ability to provide helpful feedback to peers and receive such feedback nondefensively from peers.</td>
<td>Intermediate</td>
</tr>
<tr>
<td><strong>With supervisors, the ability to make effective use of supervision, including:</strong></td>
<td></td>
</tr>
<tr>
<td>a) Ability to work collaboratively with the supervisor.</td>
<td>Advanced</td>
</tr>
<tr>
<td>b) Ability to prepare for supervision.</td>
<td>Advanced</td>
</tr>
<tr>
<td>c) Ability/willingness to accept supervisory input, including following directions, accepting feedback in an appropriate manner and following through on recommendations.</td>
<td>Advanced</td>
</tr>
<tr>
<td><strong>With support staff:</strong></td>
<td></td>
</tr>
</tbody>
</table>
a) Ability to be respectful of support staff roles and persons.  

**With teams at clinic:**

a) Ability to participate fully in team’s work.  
   Advanced

b) Ability to understand and observe team’s operating procedures.  
   Intermediate

**With community professionals:**

a) Ability to communicate professionally and work collaboratively with community professionals.  
   Intermediate

**For the fieldwork site itself:**

a) Ability to understand and observe agency’s operating procedures.  
   Advanced

b) Ability to participate in furthering the work and mission of the site.  
   Advanced

c) Ability to contribute in ways that will enrich the site.  
   Advanced

---

### 2. Skills in Application of Research

Clinical practice in all health-care fields (e.g., medicine, nursing, dentistry) is based on accumulating research results, knowledge derived from practice, and the good judgment of the clinician. A core research knowledge base and training in accessing and applying research knowledge to practice form a core competency for psychologists.

<table>
<thead>
<tr>
<th>Competency</th>
<th>Expected level by the end of AFW</th>

</tr>
<tr>
<td>b) Shares research-based information in oral and written form.</td>
<td>Intermediate</td>
</tr>
</tbody>
</table>

---

### 3. Assessment Skills

Psychological assessment includes comprehensive and integrated assessment from the initial interview, psychological testing, intervention and the evaluation of the outcome of psychological services. A foundation of knowledge and skill is needed for psychological assessment.

A. Number of assessments the student has conducted this semester: _______

B. Number of times student has made presentations of assessment reports: _______

<tr>
<td>h) Ability to develop intervention plans that contain proactive, preventive components.</td>
<td>Intermediate</td>
</tr>
<tr>
<td>i) Ability to work with others to develop school policies that help prevent problems.</td>
<td>Novice</td>
</tr>
</tbody>
</table>

**6. Diversity - Individual and Cultural Differences:**
The APA Multicultural Guidelines (APA, 2003) noted that “All individuals exist in social, political, historical, and economic contexts, and psychologists are increasingly called upon to understand the influence of these contexts on individuals' behavior” (p. 377). Thus every competency listed in this document is thoroughly linked to matters of individual and cultural difference (ICD), including knowledge related to ICD, as well as awareness of, respect for, and appropriate action related to ICD. It is critical that advanced fieldwork students begin to learn that culture influences the way that clients are perceived, the way that clients perceive the psychologist, and that culture-centered practices may be more effective than practices developed for use with only one cultural group (e.g., European Americans). Advanced fieldwork students need to know how individual and cultural differences influence clients' recognition of a problem and appropriate solutions for that problem.

<td>Intermediate</td>
</tr>
<tr>
<td>d) Demonstrates the ability to communicate effectively with</td>
<td>Intermediate</td>
</tr>
</tbody>
</table>
culturically and linguistically diverse individuals, including children, parents, and other family, school or community members.

7. Ethics:
During advanced fieldwork, the student will build on coursework in ethical practice, developing individual, practical knowledge of ethical practice, including linkage of the APA ethics code (APA, 2002) and NASP’s (2010) Professional Conduct Manual: Principles for Professional Ethics and Guidelines for the Provision of Psychological Services to behavior and decision making in actual applied settings. In addition, students should increase and apply their understanding of legal standards (state and federal). Note that each of the domains described in this document is expected as a matter of course to be grounded in ethical practice. More specifically, during advanced fieldwork training the student will work to develop the following ethical competencies:

<table>
<thead>
<tr>
<th>Competency</th>
<th>Expected level by the end of AFW</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Recognizes and adheres to ethical guidelines and legal regulations, including school specific issues.</td>
<td>Intermediate</td>
</tr>
<tr>
<td>b) Demonstrates appropriate professional assertiveness related to ethical issues.</td>
<td>Intermediate</td>
</tr>
<tr>
<td>c) Recognizes and analyzes ethical and legal issues across the range of professional activities in the advanced fieldwork setting.</td>
<td>Intermediate</td>
</tr>
<tr>
<td>d) Seeks appropriate information and consultation when faced with ethical and legal issues.</td>
<td>Advanced</td>
</tr>
<tr>
<td>e) Demonstrates a commitment to ethical and legal practice by conforming to ethical and legal standards in the provision of psychological services.</td>
<td>Advanced</td>
</tr>
</tbody>
</table>

10. Professional Development:
Fieldwork training is a key experience in professional development for the novice psychologist.

<table>

Competencies to Be Further Developed and Evaluated in Advanced Fieldwork
(These competencies are from Northeastern’s School Psychology CAGS Internship)

Professional Identity and Behavior
Advanced fieldwork students are expected to demonstrate commitment to the profession of psychology and comport themselves in a professional manner. This behavior includes but is not limited to seeking out professional development opportunities, joining professional associations, being reliable, completing tasks promptly, attending meetings, and collaborating and interacting appropriately with co-workers and supervisors.

Assessment
Students are expected to complete at least four assessment reports (see comprehensive psychoeducational assessment checklist at the end of this manual) across the two years of advanced fieldwork, at least one of them should reflect an assessment with a student from a culturally diverse background and should demonstrate awareness of cultural factors. These comprehensive case reports should reflect their best work. One report must be a comprehensive psychoeducational assessment of a student in multiple domains of functioning. Although no single report will include all the assessment methods listed below, it is expected that the graduate student will attain competency with all the methods by the end of the advanced fieldwork experience. The assessments are expected to reflect a scientific-problem-solving approach to assessment. The assessment results are expected to lead to data-based decision making and/or intervention. Redacted assessment reports will be included in the comprehensive exam portfolio.

Assessments shall include the following methods:
1. Interviewing teachers, parents, children/adolescents, and other relevant parties.
2. Administering, scoring, and interpreting assessments pertinent to determining a student’s eligibility for special education. These assessments may occur within a Response to Intervention (RTI) framework or within the more traditional psychological assessment framework.
3. Conducting systematic direct observations of the student in the classroom and/or other relevant settings.
4. Evaluating children’s behavior functioning using functional behavior assessment (FBA) methods. Based on the results of the FBA, develop a behavior intervention plan.
5. Evaluating children’s behavioral, social and adaptive functioning by means of broad and narrow band rating scales.
7. Reviewing relevant permanent products and records about the student (e.g., attendance, handwriting samples, group achievement test scores).

In addition, advanced fieldwork students are expected to:
1. Develop data-based and practical recommendations as a result of the assessment.
2. Write comprehensive case reports from an ecological perspective.
3. Present at least three case reports to team meetings that include parents.

**Intervention: Counseling**

Students are expected to counsel at least three individual or groups of children across the two years of advanced fieldwork. Counseling shall include:

1. Assessing the student's problems and the relevant context of the problems, and identifying student's strengths.
2. Developing counseling goals for the student in collaboration with students and relevant others.
3. Developing and implementing a theoretically sound and practical counseling plan for the student(s) that is evidence-based and data-driven.
4. Evaluating the outcomes of counseling, and, if necessary, revising the plan.

In addition, students are expected to keep a written record of the case, which includes progress notes of counseling sessions. Redacted case reports shall be included in the comprehensive exam portfolio. One of these cases should be written up as part of the comprehensive case studies.

**Intervention: Consultation and Collaboration**

Students are expected to provide consultative assistance to at least three staff and parents across the two years of advanced fieldwork. Students should demonstrate good understanding of family-school relationships, respect for parents, and effective communication skills when working with parents. At least one consultation case report should include a family-school collaboration component. Consultation shall involve:

1. Helping the consultee clearly identify problems and factors that might be contributing to the problems.
2. Developing consultation goals in collaboration with the consultee.
3. Developing and implementing a theoretically sound and practical intervention plan.
4. Evaluating the outcomes of and the consultee's satisfaction with consultation, and if necessary adapting the intervention plan.

Reports of one of these cases shall be included in the comprehensive case studies. The consultation case can focus on an academic or behavioral target.

**Intervention: Prevention**

Students are expected to be involved with the planning (or improvement) and evaluation of at least one professional development or school-wide student-centered prevention/promoting learning program. Planning and evaluating activities shall encompass:

1. Identifying a service delivery need
2. Setting or modifying program goals
3. Designing or redesigning a prevention program or delivering an in-service presentation to parents and/or staff
4. Evaluating the program’s implementation and outcomes

One case study relating to either prevention, the promotion of learning, or professional development shall be included in the comprehensive case studies.
Culture and Diversity
Students are expected to demonstrate multicultural competencies in all aspects of their experiences, including assessment, counseling, prevention and consultation. The culturally competent psychologist is able to sensitively deliver services to children and parents from diverse cultural, racial, and linguistic backgrounds. The three broad-based areas of multicultural competencies include:

1. Attitudes and beliefs
2. Knowledge
3. Skills

Knowledge and skills pertaining to multicultural issues must be reflected in materials submitted as part of the comprehensive exam portfolio.

Program Evaluation and Applied Research
At a minimum, students shall:

1. Share their knowledge about empirically-supported practices through presentations, handouts for parents and staff, and other means; and/or
2. Be involved in evaluating the implementation and outcomes of at least one prevention program or deliver one in-service presentation.

Ethical and Legal Issues
Consistent adherence to the ethical standards and state and federal laws relevant to psychology practice is expected. Students shall:

1. Demonstrate sensitivity to possible cognitive, ethnic, racial, and sexual biases.
2. Demonstrate knowledge of state and federal laws.
3. Be familiar with and conform to the ethical standards established by the National Association of School Psychologists and the American Psychological Association.
4. Knowledge of ethical and legal issues should be reflected in materials submitted as part of the comprehensive exam portfolio.

Communication and Information Technology
Students shall demonstrate their competence in:

1. Written communication by means of assessment reports, case summaries and other written documentation provided for the comprehensive exam portfolio.
2. Oral communication skills by means of reports given at team meetings.
3. Information technology by either participation in an online discussion forum, appropriate use of e-mail for communicating with either staff or parents, or the documentation of the use of online resources for locating identifying evidence-based practices.

Knowledge and skills pertaining communication and information technology must be reflected in materials submitted as part of the comprehensive exam portfolio.
**Special Competencies**
The above reflects minimum requirements. Most students will surpass these requirements in their advanced fieldwork experience. Some students develop special competency in certain area, e.g., early intervention, behavioral analysis, bilingual assessment, depending on students’ interest.

**Overview of the Advanced Fieldwork Evaluation System**
The overarching purpose of the advanced fieldwork evaluation system is to provide data so that judgments can be made about different elements of the school psychology doctoral program. The obtained data are used to assess the graduate student's progress and to further develop and improve the overall school psychology doctoral program at Northeastern University. The following areas are evaluated:

1. The graduate student's progress with respect to important school psychology knowledge and skills.
2. The quality of the Program’s training and supervision.
3. The quality of the field site’s training offerings and supervision.

**Deadlines for Essential Paperwork for the Program and Certification**
*Students should retain a copy of all their paperwork for their records. The Department will only keep records for seven years.*

**Fall Paperwork**
- Advanced Fieldwork Training Plan (completed in E*Value and emailed to university and field supervisors by Class 2)
- Last class of fall semester:
  - Evaluation of the Student by the Site Supervisor (E*Value)
  - Signed fieldwork hours in MyPsychTrack
  - Evaluation of Seminar Leader by Student (E*Value)

**Spring Paperwork**
- Signed fieldwork hours in MyPsychTrack
- End-of-Year Advanced Fieldwork Form (hard copy; Note students should prepare one form for each year of Advanced Fieldwork),
- Evaluation of the Student by the Site Supervisor (E*Value),
- Evaluation of Site Supervisor by Student (E*Value),
- Student Evaluation of the Site (E*Value),
- Evaluation of Seminar Leader by Student (E*Value)
- Satisfaction with the School Psychology Program (E*Value)

Additionally, the following should be turned during the final class of Advanced Fieldwork 4:
- School Psychology Praxis II Scores, **including all subtests** (upload in E*Value)
- MA DESE: Initial License as a School Psychologist (hard copy)
- MA DESE: Preservice Assessment form for Teachers (hard copy)
- Educator License Information Sheet Request for an Initial License (hard copy; Note: **Students need to attach an official, hard copy transcript to this form. Hard copies of an**
electronic transcript are not accepted by the DESE. Students also need to attach proof of payment from the ELAR system).

- NCSP application forms (download from NASP website)—program verification and internship verification forms
Advanced Fieldwork Training Plan

Advanced Fieldwork hours may meet the Massachusetts Board of Registration of Psychologists criteria for Advanced Practica so long as the Board’s requirements are met (http://www.mass.gov/ocabr/licensee/dpl-boards/py/regulations/rules-and-regs/251-cmr-300.html#3.04). One of these requirements is for students to have “a written training plan among the student, the advanced practicum training site, and the graduate training program.”

The training plan for each advanced practicum experience shall describe how the trainee's time is allotted and shall assure the quality, breadth, and depth of the training experience through specification of the goals and objectives of the advanced practicum, and the methods of evaluation of the trainee's performance.

Advanced practicum training plans shall also include the nature of supervision, the identities of the supervisors, and the form and frequency of feedback from the agency supervisor to the doctoral training program's faculty.

The advanced practicum training plan shall also provide a rationale for the experience in light of previous academic preparation and previous practicum training, to ensure that the overall advanced practicum experience is organized, sequential, and meets the training needs of the trainee and the protection of the public.

At least 50% of the total hours of supervised experience shall be in service-related activities, defined as treatment/intervention, assessment, interviews, report writing, case presentations, and consultations.

At least 25% of the supervised professional experience shall be face-to-face patient/client contact.

The student must receive a minimum of two hours of individual supervision per week. A minimum of one hour of individual or group supervision must take place for each 16 hours of work. The group size may not exceed three.
Advanced Fieldwork Training Plan

Student Name: _________________________________________________________

Placement Information:
Appointment Period (mm/dd/yy to mm/dd/yy): _____________________________
Setting/Placement: ______________________________________________________
Time Allocation at the Site: ________________________________________________
______________________________________________________________________
Address:  ______________________________________________________________

Supervisor Information:
Name: ___________________________
Title: ____________________________
License #: ________________________

Supervision Plan (nature and frequency of supervision):
_______________________________________________________________________
_______________________________________________________________________

Student Evaluations and Form and Frequency of Feedback to the University Supervisor:
• Supervisor Evaluations of the Student are completed at the end of the fall and spring
  semesters. Supervisors should review their evaluations with their student prior to
  submitting them through the E*Value system. 2016-2017 Student Evaluation Dates:
  Fall: 12/7/16; Spring: 4/5/17
• The university supervisor has at least two face-to-face meetings with the field supervisor
  and the student. These visits are documented on the Program’s MA DESE Initial License
  as a School Psychologist form.

Rationale for the Experience: (please describe a rationale for the Advanced Fieldwork experience
in light of previous academic preparation and previous practicum training. This is done to
ensure that the overall advanced practicum experience is organized, sequential, and meets the
training needs of the trainee and the protection of the public).

Guidelines for Preparing Comprehensive Case Studies

The purpose of the comprehensive case studies is for the AFW student to demonstrate that he/she has obtained the basic competencies required to be an effective beginning school psychologist. In particular, these cases represent authentic learning experiences by which the AFW student can provide evidence that he/she has obtained the basic competencies pertaining to the National Association of School Psychologist’s (NASP) 2010 Standards as well as to the training goals of Northeastern University’s (NU) specialist level (MS/CAGS) program in school psychology.

Toward these aims, AFW students must prepare at least two comprehensive case studies each semester and a total of four cases across two semesters. These comprehensive case reports need to be incorporated into the student’s updated portfolio. Students should exclude information (e.g., names) that might lead to the identification of individuals.

During the AFW year, students must complete the following case reports:

- Consultation: Academic Problem
- Consultation: Behavioral Problem
- Counseling Case
- Prevention/Promoting Learning School-Wide or Staff Professional Development

Each case addresses a subset of NASP standards and NU training goals, but collectively the four cases address all NASP standards and training goals. This coverage is delineated in the tables below.

**Comprehensive Case 1: Consultation on Academic Problem**

**NASP Standards Addressed**

II Data-Based Decision-Making and Accountability

III Consultation and Collaboration

4.1 Interventions and Instructional Support to Develop Academic Skills

VI Family–School Collaboration Services

VII Diversity in Development and Learning

8.1 Research and Program Evaluation

8.2 Legal, Ethical, and Professional Practice

**Program Training Goals Addressed**

- Assessment
- Culture and Diversity
- Ethical and Legal Issues
- Intervention: Consulting and Collaborating
- Program Evaluation and Applied Research
- Ethical and Legal Issues
- Communication and Information Technology
Comprehensive Case 2: Consultation on Behavioral Problem

NASP Standards Addressed
II Data-Based Decision-Making and Accountability
III Consultation and Collaboration
a. Interventions and Mental Health Services to Develop Social and Life Skills
VI Family–School Collaboration Services
VII Diversity in Development and Learning
8.1 Research and Program Evaluation
8.2 Legal, Ethical, and Professional Practice

Program Training Goals Addressed
 o Assessment
 o Culture and Diversity
 o Ethical and Legal Issues
 o Intervention: Consulting and Collaborating
 o Program Evaluation and Applied Research
 o Communication and Information Technology

Counseling Case Study

NASP Standards Addressed: Counseling Case
II Data-Based Decision-Making and Accountability
4.2 Interventions and Mental Health Services to Develop Social and Life Skills
VI Family–School Collaboration Services
VII Diversity in Development and Learning
8.1 Research and Program Evaluation
8.2 Legal, Ethical, and Professional Practice

Program Training Goals Addressed
 o Assessment
 o Culture and Diversity
 o Ethical and Legal Issues
 o Intervention: Counseling
 o Program Evaluation and Applied Research

Prevention Case Study

The AFW student provides a report about his/her involvement in a school-wide or school district prevention program. Examples of prevention programs include: bullying prevention programs, crisis prevention/response, response to intervention (RtI) program, training parents in
behavior management, health promotion programs such as the promotion of good eating habits or programs designed to increase physical activity. The AFW student’s role in the program could encompass many different activities, including one or more of the following: needs assessment; evaluation of the program’s implementation or outcomes; program implementation; and training/technical assistance via inservice workshops, PowerPoint presentations, and distribution of information about empirically supported practices. Both a prevention program for students and a professional development program for staff can be conceptualized as system-level prevention that can promote student health, positive development among children, or prevent behavioral or academic problems.

**NASP Standards Addressed: Prevention Case**

II Data-Based Decision-Making and Accountability  
III Consultation and Collaboration  
5.1 School-Wide Practices to Promote Learning  
5.2 Preventive and Responsive Services  
8.1 Research and Program Evaluation

**Program Training Goals Addressed**

- Intervention: Consulting and Collaborating  
- Intervention: Prevention  
- Program Evaluation and Applied Research  
- Communication and Information Technology
Comprehensive Case Reports during Advanced Fieldwork: Scoring Guide

Across the two years of AFW students must satisfactorily complete four case reports. In order to earn a passing grade in AFW 4, students must earn a passing score of 2 (meeting expectations for advanced fieldwork students) on each of the four case reports.

Scoring Guidelines for Each Section within a Case Study

Two criteria are considered in each section: (a) comprehensiveness and (b) adequacy of school psychology knowledge or skill. Quality of writing is rated for the entire case report. Each criterion is scored on the following scale: 3 = Above Expectations for AFW Students, 2 = Meets Expectations for AFW Students, 1 = Below Expectations (Unsatisfactory) for AFW Students.

Comprehensiveness (CO) refers to the extent to which the components of a section are addressed and the extent to which sufficient detail and/or examples are provided. A score of 3 (Above Expectations for AFW Students) is earned if all components are addressed in sufficient detail. A score of 2 (Meets Expectations for AFW Students) is earned if all components are addressed and almost all components are discussed in sufficient detail. A score of 1 (Below Expectations for AFW Students) is earned if one or more components are omitted or if multiple components are not discussed in sufficient detail.

Adequacy of School Psychology Knowledge or Skill (KS) denotes whether or not the information provided in a section indicates that an individual has attained the knowledge and/or skill level expected for an AFW student with respect to the individual components and the integration of those components. A score of 3 (Above Expectations for AFW Students) is earned if most components reflect an advanced level of knowledge or skill for an AFW student. A score of 2 (Meets Expectations for AFW Students) is earned if most components reflect a knowledge or skill level that is expected of an AFW student. A score of 1 (Below Expectations for AFW Students) is earned if multiple components reflect a knowledge or skill level that is below the level expected for an AFW student.

Quality of Writing (QW) refers to the use of succinct and clear language that is devoid of jargon, pejorative or judgmental language, grammatical problems, colloquial expressions, typographical and spelling errors. Sentences and ideas within and between sections are logically related to one another. A score of 3 (Above Expectations for AFW Students) is earned if most of the writing within a section reflects an advanced skill level. A score of 2 (Meets Expectations for AFW Students) is earned if most of the writing within a section reflects an adequate skill level. A score of 1 (Below Expectations for AFW Students) is earned if most of the writing is problematic with respect to the above criteria.
1. **Consultation Case: Academic Problem**

<table>
<thead>
<tr>
<th>Scores (1 to 3)</th>
<th>Required Components for Each Section</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>A. Background and Context</strong></td>
<td>Description includes (a) type of school and community, (b) relevant system factors (e.g., family or school) that might affect the case, and (c) the behavior setting(s) where the problem occurs (e.g., number of people, stressors, types of activities, demands, relevant interpersonal or group process variables in classroom, etc.)</td>
</tr>
<tr>
<td><strong>B. Description of Student</strong></td>
<td>Description includes (a) student’s age, grade level, and educational placement, (b) apparent problem(s) in <em>specific, behavioral terms</em>, (c) student’s strengths, interests, and weaknesses, (d) relevant biological or developmental factors, and (e) relevant social, cultural or linguistic factors.</td>
</tr>
<tr>
<td><strong>C. Hypothesis Development</strong></td>
<td>Discussion includes (a) previous attempts resolve the problem, (b) the conditions under which the problem does and does not occur, (c) possible causal factors which are potentially controllable by either the student or consultee (e.g., antecedent, consequence, setting event), and (d) hypothesis about possible controllable causes of the problem. Description indicates that the AFW student carefully considered the extent to which the problem reflects a skill and/or motivational deficit.</td>
</tr>
<tr>
<td><strong>D. Data Collection</strong></td>
<td>Data collection methods are appropriate given the nature of the referral problem and hypothesis, and given the developmental level, strengths and needs of the student. The assessment process takes into account the influence of biological, cultural, family and other social factors on academic skills (academic problem case study) or on behavior and social skills (behavior problem case study). The data collection section must include a graphic display of baseline and intervention phase data and a detailed description and rationale for data collected. All data collection forms are included. The description includes (a) direct and indirect data collection methods, (b) a measure of the student’s academic skills and <em>if warranted</em> a measure of the student’s cognitive skills, (c) who assessed what areas, (d) when assessments occurred, and (e) the extent to which the data collection plan was implemented as intended.</td>
</tr>
<tr>
<td><strong>E. Intervention Plan</strong></td>
<td>Description includes (a) any revisions made to operational definition as a result of data collection, (b) results of data collection and relevance for hypothesis, (c) graphical depiction of relationship between problem and one or more relevant variables (e.g., hypothesized function), (d) intervention goals and objectives that were derived from the data, and (e) a clear description, documentation, and justification of the intervention program. The justification should be based on the results of the data collection (i.e., assessment) and a review of the research on relevant interventions. The discussion indicates that the AFW student took into consideration: (a) a broad-based understanding of the problem derived from the data collection, (b) relevant</td>
</tr>
</tbody>
</table>
ecological factors, such as sociocultural aspects of the case and the classroom context, and (c) the individual characteristics of the student, including strengths, interests, and skill level. Description of case includes how parent(s) were involved with the plan, and how school personnel communicated with them about the plan and their child’s progress. Describe how the student’s/parents’ cultural background was taken into consideration in planning the intervention. *The intervention plan includes appropriate methods for assessing the implementation of the intervention (treatment fidelity).*

**F. Evaluation of Intervention**

The evaluation part of the report includes a detailed description of the extent to which the intervention was implemented as planned. A summary of intervention outcomes is provided with respect to (a) goals, (b) individuals’ reactions to the intervention (at least the consultee and student), and (c) related effects. A summary of the student’s, consultee’s and relevant others’ reactions to the overall consultation process is provided. A description is provided of how and why the intervention plan will be modified as a result of the evaluation. In the **Appendix** of the report, there is a clearly labeled graph (using APA style) that compares baseline and intervention data with respect to intervention goals.

**G. Description and Critique of Process Issues**

A description and critique of the process issues in this case are provided, including a self-reflection that considers the extent to which the AFW student:

- used a systematic and reflective approach to problem-solving;
- established a mutually rewarding and collaborative process;
- took other people’s ideas, concerns and constraints into consideration in designing the data collection and intervention plans;
- appropriately communicated with others during design, implementation, and evaluation of the consultation case.

*The AFW student provided brief examples of his/her strengths and weaknesses with respect to the above behaviors.*

**H. Reference List of Articles Reviewed for Intervention Plan**

At the end of the case report, a list of references provides empirical support for one or more of the intervention strategies. References should be relatively recent and relevant to the nature of the problem.

**I. Appendix on Information Technology**

AFW student summarizes how he/she appropriately used information technologies in this case. For example, information technology could be used in analyzing the data (e.g., graphing of data), developing forms for data collection or intervention, researching what interventions have empirical support, or communicating with teachers or parents.

**J. Appendix on Ethical and Legal Issues**

A description is provided of how the AFW student abided by relevant NASP ethical standards and laws in collaborating with others, conducting the assessment, and designing and implementing the intervention. Examples are provided and specific standards and laws are cited. A description is provided of what names or other possible identifying information were changed or
omitted from the report to protect the anonymity of individuals.

<table>
<thead>
<tr>
<th>CO</th>
<th>K. Appendix on Supervision: A description is provided of how the AFW student used supervision to guide and inform his/her case study. The format, frequency and methods of supervision should be described.</th>
</tr>
</thead>
<tbody>
<tr>
<td>KS</td>
<td><strong>QW</strong> Use succinct and clear language that is devoid of jargon, pejorative or judgmental language, grammatical problems, colloquial expressions, typographical and spelling errors. Sentences and ideas within and between sections are logically related to one another.</td>
</tr>
</tbody>
</table>

### Overall Case Score

- **Above Expectations (3):** Most sections were Above Expectations (3), and *none* were Below Expectations (1)
- **Meets Expectations (2):** All sections Met Expectations (2), and *none* were Below Expectations (1)
- **Below Expectations (1):** *One or more* sections were Below Expectations (1)
### 2. Consultation Case: Behavioral Problem

<table>
<thead>
<tr>
<th>Scores (1 to 3)</th>
<th>Required Components for Each Section</th>
</tr>
</thead>
<tbody>
<tr>
<td>CO</td>
<td>A. Background and Context</td>
</tr>
<tr>
<td>KS</td>
<td>Description includes (a) type of school and community, (b) relevant system factors (e.g., family or school) that might affect the case, and (c) the behavior setting(s) where the problem occurs (e.g., number of people, stressors, types of activities, demands, relevant interpersonal or group process variables in classroom, etc.)</td>
</tr>
<tr>
<td>CO</td>
<td>B. Description of Student</td>
</tr>
<tr>
<td>KS</td>
<td>Description includes (a) student’s age, grade level, and educational placement, (b) reason for referral (s) in specific, behavioral terms, (c) student’s strengths, interests, and weaknesses, (d) relevant biological or developmental factors, and (e) relevant social, cultural or linguistic factors.</td>
</tr>
<tr>
<td>CO</td>
<td>C. Hypothesis Development</td>
</tr>
<tr>
<td>KS</td>
<td>Discussion includes (a) previous attempts resolve the problem, (b) the conditions under which the problem does and does not occur, (c) possible causal factors which are potentially controllable by either the student or consultee (e.g., antecedent, consequence, setting event), and (d) hypothesis about possible function of the problem. Description indicates that the AFW student carefully considered the extent to which the problem reflects a skill and/or motivational deficit.</td>
</tr>
<tr>
<td>CO</td>
<td>D. Data Collection</td>
</tr>
<tr>
<td>KS</td>
<td>Data collection methods are appropriate given the nature of the referral problem and hypothesis, and given the developmental level, strengths and needs of the student. The assessment process takes into account the influence of biological, cultural, family and other social factors on behavior and social skills. The data collection section must include a graphic display of baseline and intervention phase data and a detailed description and rationale for data collected. Includes all data collection forms. The description should include (a) direct and indirect data collection methods used to assess the problem and conditions functionally related to the problem, (b) dimensions (e.g., frequency) assessed, (c) who assessed what areas, (d) when assessments occurred, and (e) the extent to which the data collection plan was implemented as intended.</td>
</tr>
<tr>
<td>CO</td>
<td>E. Intervention Plan</td>
</tr>
<tr>
<td>KS</td>
<td>Discussion includes (a) any revisions made to operational definition as a result of data collection, (b) results of data collection and relevance for hypothesis, (c) intervention goals and objectives that were derived from the data, and (d) a clear description, documentation, and justification of the intervention program. The justification was based on the results of the data collection (i.e., assessment), the student’s strengths and interests, consideration of a possible keystone variable, and a review of the research on relevant interventions. The documentation of data collection includes (a) a broad-based understanding of the problem and hypothesized function derived from</td>
</tr>
</tbody>
</table>
the data collection, and (b) relevant ecological factors, such as relevant sociocultural aspects of the case and the classroom context, and (c) the individual characteristics of the student, including skill level. Description of case includes how school staff and parent(s) were involved with the plan plan’s development and were kept informed about the child’s progress. Describe how the student’s/parents’ cultural background was taken into consideration in planning the intervention. The intervention plan includes appropriate methods for assessing the implementation of the intervention (treatment fidelity).

### F. Evaluation of Intervention

The evaluation part of the report includes a detailed description of the extent to which the intervention was implemented as planned. A summary of intervention outcomes is provided with respect to (a) goals, (b) individuals’ reactions to the intervention (at least the consultee and student), and (c) related effects. At a minimum, the evaluation of intervention effects should involve comparisons between the level and trend of data baseline and one or more intervention conditions. Three data points in the baseline phase is considered the minimal standard, though ideally baseline data collection will be continued until stable responding is demonstrated. Based on the available data, a judgment is made about to what extent any changes might be attributable to the intervention (i.e., impact of the intervention on the student). A description is provided of how and why the intervention plan will be modified as a result of the evaluation. In the Appendix of the report, there is a clearly labeled graph (using APA style) that compares pre- and post-intervention data with respect to intervention goals.

### G. Description and Critique of Process Issues

A description and critique of the process issues in this case are provided, including a summary of the student’s, consultee’s and relevant others’ reactions to the overall consultation process. The discussion of process issues includes a self-reflection that considers the extent to which the AFW student:

- used a systematic and reflective approach to problem-solving;
- established a mutually rewarding and collaborative process;
- took other people’s ideas, concerns and constraints into consideration in designing the data collection and intervention plans;

The AFW student provided brief examples of his/her strengths and weaknesses with respect to the above behaviors.

### H. Reference List of Articles Reviewed for Intervention Plan

At the end of the case report, a list of references provides empirical support for one or more of the intervention strategies. References should be relatively recent and relevant to the nature of the problem.

### I. Appendix on Information Technology

AFW student summarizes how he/she appropriately used information technologies in this case. For example, information technology could be used in analyzing the data (e.g., graphing of data), developing forms for data collection or intervention, researching what interventions have empirical support, or communicating with teachers or parents.
<table>
<thead>
<tr>
<th>CO</th>
<th>J. Appendix on Ethical and Legal Issues: A description is provided of how the AFW student abided by relevant APA and NASP ethical standards and laws in collaborating with others, conducting the assessment, and designing and implementing the intervention. Examples are provided and specific standards and laws are cited. A description is provided of what names or other possible identifying information were changed or omitted from the report to protect the anonymity of individuals.</th>
</tr>
</thead>
<tbody>

### 3. Counseling Case

<table>
<thead>
<tr>
<th>Scores (1 to 3)</th>
<th>Required Components for Each Section</th>
</tr>
</thead>
<tbody>
<tr>
<td>CO</td>
<td>A. Referral Question / Problem: The referral question or problem was used as a basis for conceptualizing the case. Took the necessary steps to clarify the referral question.</td>
</tr>
<tr>
<td>KS</td>
<td></td>
</tr>
<tr>
<td>CO</td>
<td>B. Description of Student</td>
</tr>
<tr>
<td>KS</td>
<td>Description includes (a) student’s age, grade level, and educational placement, (b) apparent problem(s) in <em>specific terms</em>, (c) student’s strengths, interests, and weaknesses, (d) relevant biological or developmental factors, and (e) relevant social, cultural or linguistic factors.</td>
</tr>
<tr>
<td>CO</td>
<td>C. Assessment of the Problem</td>
</tr>
<tr>
<td>KS</td>
<td>Assessment methods are appropriate given the nature of the referral problem, and given the developmental level, strengths and needs of the student. The assessment process takes into account the influence of biological, cultural, family and other social factors on socio-emotional or behavioral functioning.</td>
</tr>
<tr>
<td>CO</td>
<td>D. Hypothesis Development</td>
</tr>
<tr>
<td>KS</td>
<td>Discussion includes (a) previous attempts to resolve the problem, (b) the conditions under which the problem does and does not occur, and (c) possible causal factors which are potentially controllable by the student (e.g., antecedent, consequence, setting event, faulty thinking)</td>
</tr>
<tr>
<td>CO</td>
<td>E. Counseling Plan</td>
</tr>
<tr>
<td>KS</td>
<td>The AFW student provides (a) counseling goals that were derived from the results of the assessment of the problem, (b) a description and justification for his/her theoretical approach to this case (e.g., cognitive-behavioral) and (c) a clear description, documentation, and justification of the counseling strategies that are linked to the goals. The justification is based on the results of the data collection (i.e., assessment), the student’s strengths and interests, and a review of the research of counseling interventions. The AFW student describes how the child and parent(s) were involved with setting the counseling goal/s and plan, and how the AFW student communicated with them about the goal/s and plan and the child’s progress. The AFW student provides a description of how the student’s/parents’ cultural background was taken into consideration in planning the counseling. If applicable, the case description should include the extent to which collaboration on this case included community agencies or might involve community agencies in the future.</td>
</tr>
<tr>
<td>CO</td>
<td>F. Evaluation of Counseling Outcome</td>
</tr>
<tr>
<td>KS</td>
<td>The evaluation part of the counseling report includes a detailed description of the extent to which the counseling strategies were implemented as planned. A summary of counseling outcomes is provided with respect to (a) goals, (b) the student’s and others’ (e.g., teachers, parents) reactions to counseling, and (c) related effects. Based on the available data, the intern determined to what extent any changes might be attributable to the counseling (i.e., impact of the counseling on the student).</td>
</tr>
</tbody>
</table>
summary is provided of the student’s and relevant others’ reactions to the overall counseling process. A discussion is provided of if, how and why the counseling plan will be modified as a result of the evaluation. In the Appendix of the report, there is a clearly labeled graph (using APA style) that compares pre-counseling and post-counseling data with respect to counseling goals.

4. Prevention Case Study

This report can be in the traditional written case study format or an oral presentation combined with PowerPoint slides. If an oral presentation is used in conjunction with PowerPoint slides, it is the AFW student’s responsibility to ensure that all required components are presented in a manner that clearly communicates or documents that the student’s work meets the criteria (i.e., CO, KS, QW) for the prevention case study. Both a prevention program for students and a professional development program for staff (e.g., inservice presentation) can be conceptualized as systems level prevention that can promote learning and positive development among children, and prevent behavioral or academic problems. AFW students should provide a report about their involvement in the implementation of a prevention program, a program that promotes school-wide learning or a professional development program in their school or school system. The program could consist of any program delivered by the AFW student, school personnel or community partners. Examples or prevention programs include: bullying prevention programs, training parents in behavior management, health promotion programs such as the promotion of good eating habits or programs designed to increase physical activity. Examples of activities that promote school-wide learning could be a program that aims to improve reading skills of all students through a three-tiered RtI (response-to-intervention) and school-wide activities promoting multicultural awareness and or multicultural education.

<table>
<thead>
<tr>
<th>Scores (1 to 3)</th>
<th>Required Components for Each Section</th>
</tr>
</thead>
<tbody>
<tr>
<td>CO</td>
<td>A. Background and Context</td>
</tr>
<tr>
<td>KS</td>
<td>Relevant ecological context including school system or school issues was described. The program was described including its purpose, goals, methods, and intended service recipients. Relevant studies are cited supporting the efficacy of the prevention program and/or the information/ training provided to staff. Modifications of the program and the justification for these changes were discussed. Implementation barriers and the school’s readiness for change were discussed. Any efforts to facilitate readiness for change were discussed.</td>
</tr>
<tr>
<td>CO</td>
<td>B. Description of the General Problem Addressed by the Program</td>
</tr>
<tr>
<td>KS</td>
<td>The general problem area (e.g., injuries in the school yard) addressed by the prevention or training program was described. Discussion was provided about the process of determining that the problem was a high priority.</td>
</tr>
<tr>
<td>CO</td>
<td>C. Phase 1: Data Collection Plan</td>
</tr>
<tr>
<td>KS</td>
<td>A description of the needs assessment conducted for the program was provided (i.e., how it was determined that there is a need for the program). This might have occurred by means of a questionnaire, interviews, observations, and/or a review of relevant documents or available data. Typically, the needs assessment is used to pinpoint specific needs (knowledge and skills) and how the content will be delivered.</td>
</tr>
<tr>
<td>CO</td>
<td>D. Phase 2: Program Planning</td>
</tr>
<tr>
<td></td>
<td>Discussion includes:</td>
</tr>
<tr>
<td>KS</td>
<td>1. Specific prevention / training goals (knowledge, skills) that were derived from the needs assessment data, and a clear description, documentation, and justification for the prevention program. The justification is based upon (a) empirically supported practices, (b) results of the needs assessment, and (c) relevant ecological factors, such as the available resources, the staff’s availability and readiness for change, and administrator/community support.</td>
</tr>
<tr>
<td>KS</td>
<td>2. Information about how the school context (e.g., climate, leadership, organizational structure) influenced the plan.</td>
</tr>
<tr>
<td>KS</td>
<td>3. The extent to which the strengths of the school, and factors related to student resilience and risk were taken into consideration in planning the program.</td>
</tr>
<tr>
<td>KS</td>
<td>4. Any modifications of to an existing program and the justification for these changes.</td>
</tr>
<tr>

Comprehensive Psychoeducational Assessment Checklist

NASP Standards Addressed:
II Data-Based Decision-Making and Accountability
4.1 Interventions and Instructional Support to Develop Academic Skills
VII Diversity in Development and Learning
8.2 Legal, Ethical, and Professional Practice

Program Training Goals Addressed:
  o Assessment
  o Culture and Diversity
  o Ethical and Legal Issues
  o Communication and Information Technology

Check List

<table>
<thead>
<tr>
<th>Yes/No</th>
<th>Required Components for Each Section</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>A. Background and Context</td>
</tr>
<tr>
<td></td>
<td>This section should include all relevant data: cultural (race, gender, age, class, identity) background, family, birth and developmental issues when relevant, education, academic performance, onset of difficulty, and prior intervention.</td>
</tr>
<tr>
<td></td>
<td>B. Biological information: Hearing, vision, any health issues, physical disabilities, medications, family health history, when relevant.</td>
</tr>
<tr>
<td></td>
<td>C. Reason for Referral and Choice of Assessment Measures: The reason(s) for referral should be clearly stated. The purpose of the assessment should be phrased in terms of questions that can be answered. The assessment measures should be tailored to the referral question and to the client. Where there are constraints on the choice of instruments, justify your selection and explain the potential impacts on the quality of assessment in an Appendix. The latest versions of the instruments should be used. A comprehensive evaluation means that three or more of the following domains of functioning are assessed: (a) academic skills and performance, (b) behavior, (c) cognition, (d) social and emotional functioning, and (e) life skills. Data are derived from multiple assessment methods (interviews, tests, rating scales, direct observation, record review). All evaluations should include interviews with the child, parents, and teachers.</td>
</tr>
</tbody>
</table>
|        | D. Linking Data to Inferences: Inferences must be based on valid representations of assessment data. Only make those inferences for which the assessment or test is valid. The link between the data collected, inferences, conclusions, and recommendations should be clear. The content of the assessment report should answer the referral question(s), provide a clear understanding of the strengths, deficits, interests, and general functioning of the client, and distinguish between aspects of the individual that appear to be certain from those that are questionable. The report should also provide alternative explanations for the findings, where relevant. Rather than provide all the data in detail, summarize what the data indicate with respect to the referral problem /
initial hypothesis. The conceptualization should reflect an ecological perspective. In particular, the report should explicitly consider contextual factors that affect the individual, including cultural and linguistic factors. Explain the connection between the referral problem and contextual factors.

<table>
<thead>
<tr>
<th>E. Summary and Recommendations:</th>
<th>Summarize the important findings and provide recommendations. Recommendations should be linked to assessment data, background information, and contextual factors, such as cultural and linguistic factors. Recommendations should take into consideration empirically-supported strategies. Recommendations should be both practical and specific. Recommendations should build upon the student’s strengths and/or interests, as well as his/her difficulties and also the opportunities and constraints in the student’s environment. In collaboration with others, the assessment is used to develop goals for the student.</th>
</tr>
</thead>
<tbody>
<tr>
<td>F. Appendix on Information Technology:</td>
<td>Summarize what information technologies you used during the assessment (e.g., computer scoring program), analyzing the data (e.g., graphing of data), or writing the report (e.g., using digital databases to find research articles).</td>
</tr>
<tr>
<td>G. Appendix on Ethical and Legal Issues:</td>
<td>Indicate how you abided by relevant NASP and APA ethical standards in conducting the assessment and reporting the results. Cite the specific standards. For example, taking adequate steps to protect anonymity: omit names of people, birthdates, towns, school systems, etc. Indicate how you abided by relevant state and national laws or regulations. Cite the specific laws or regulations.</td>
</tr>
<tr>
<td>H. Language:</td>
<td>Use succinct and clear language that is devoid of jargon, pejorative or judgmental language, grammatical problems, colloquial expressions (e.g., mom), typographical and spelling errors. Sentences and ideas within and between sections are logically related to one another. Write in specifics rather than in overly broad generalizations. If a diagnostic category is used (e.g., attention deficit disorder), describe specifically what behaviors are relevant for this case.</td>
</tr>
<tr>
<td>I. Appendix on Supervision:</td>
<td>A description is provided of how the AFW student used supervision to guide and inform his/her case study. The format, frequency and methods of supervision should be described.</td>
</tr>
</tbody>
</table>
Checklist for Addressing IDEA’s Exclusionary Clause for Specific Learning Disability (SLD) Identification

Psychoeducational assessment reports demonstrate consideration of cultural and linguistic issues in every section of the report. For example, in the background section, the child’s English language proficiency, language spoken at home, ethnicity, and other relevant information about cultural and ecological context should be included. When assessing a linguistically diverse child, language dominance and proficiency of English should be assessed before determining who (bilingual or monolingual school psychologist) should evaluate the child and what methods and tools should be used. In the section describing the assessment methods and tools used, the rationale for selecting the listed methods and instruments should be reported (briefly) along with the cultural validity of the instruments for the child and the referral question. Cultural and linguistic consideration should be evident in test administration and interpretation, case conceptualization, and intervention goals and strategies.

In determining SLD eligibility, the multidisciplinary team must rule out that the primary cause of the deficit is caused by (a) a visual, hearing, or motor disability, (b) mental retardation, (c) emotional disturbance, (d) cultural factors, (e) environmental or economic disadvantages, or (f) limited English proficiency.

How to establish evidence for students

<table>
<thead>
<tr>
<th>Inquire:</th>
<th>Yes</th>
<th>No</th>

</table>

Collect comprehensive background information

| School history |     |    |          |
| Developmental history |     |    |          |
| Functioning at home and school, including relationships with family members, peers and teachers |     |    |          |
| Mental and physical health including visual, hearing and motor functioning |     |    |          |
| Cultural and linguistic information of the child and family, such as culture of origin, birth place, immigration, languages spoken by the child and parents at home |     |    |          |
Environmental and socio-economic conditions at home

Ensure that the information is collected from multiple sources, including a careful review of the school record, and interviews with the child, parents/care-takers and teachers.

For ELL students, gauge English and native language proficiency and acculturation level especially before testing with nationally standardized norm-referenced instruments.

**Address the IDEA exclusionary clause of inappropriate instruction**

Understand teacher perceptions about the student’s lack of academic progress by examining comparison standards. (Is the ELL student being compared to native English speakers?)

To what extent does the student understand teacher instruction?

Does the instruction address the student’s needs?

**Address the IDEA exclusionary clause of emotional disturbance**

Review the information from the referral source, school records, and interviews with the child, parents/care-takers and teachers.

If no concern about socio-emotional functioning from any source, no formal assessment in this area will be warranted.

If there are concerns: Take into account the stressors from differential expectations between home and school. Conduct an assessment based on the IDEA criteria for emotional disturbance.

HOW TO APPLY FOR MASSACHUSETTS EDUCATOR LICENSURE

The following is the preferred method for applying for Licensure in Massachusetts. Licensure Candidates are responsible for applying for their educator’s license and completing the appropriate requests for Institutional Endorsement. Use the ELAR portal to apply and check your licensure status.

1) Go to http://www.mass.gov/edu/gateway. This brings you to the “Login to MassEdu Gateway, ELAR, and the EEC Single Sign-In” page. Click the “ELAR” portal graphic and log in. (You should already be in the system. If you have not, click “Create ELAR Profile”, follow the instructions, then log in.)

2) Choose the ELAR welcome page, then choose “Apply for a New License”.

3) Select Field, Level, and Type.

<table>

<tr>
<td>Field Biology</td>
<td>Field: Principal/Assistant Principal</td>
</tr>
<tr>
<td>Level: 8-12</td>
<td>Level: 5-8</td>
</tr>
<tr>
<td>Type: Initial</td>
<td>Type: Initial</td>
</tr>
</tbody>
</table>

4) Pay for license. You will need a credit card number for the payment ($100 for first license, $25.00 for each additional license).

5) Print the “Step 4 Confirm Application” page (or any page) that shows which license you are requesting to include with your “Request for Licensure”.

---

HOW TO UPLOAD TRANSCRIPTS TO YOUR ELAR ACCOUNT

Licensure Candidates should upload their transcripts to their Massachusetts Department of Elementary and Secondary Education “ELAR” account in order to be endorsed for Initial License.

Transcripts for Degrees/Credits Already Earned

- If candidates have completed coursework for previous degrees at Northeastern University or elsewhere, these transcripts must all be uploaded into the system.
- Transcripts must be requested from the institution where credits were earned. Licensure candidates should request an official transcript and have it sent directly to them. (*Electronic copies are only accepted if institution seal, Registrar signature, and back of transcript are clearly visible.*)

Transcript for Northeastern University Licensure Endorsement

- Request official, hard copy of transcript after degree conferral. This can be done through myNEU account or through the University Registrar (http://www.northeastern.edu/registrar/). This transcript should be sent directly to the Candidate. (*Electronic copies from NEU do NOT have seal, Registrar signature, and back of transcript. Therefore, hard copies are necessary and these items must be clearly visible on the final file upload.*)

Uploading Transcripts to ELAR

- Upload NU graduate transcript to ELAR by following the instructions provided in the following link: http://www.mass.gov/edu/government/departments-and-boards/ese/programs/educator-effectiveness/licensure/how-to-use-the-elar-portal/uploading-documents-to-your-elar-account.html

</tbody>
</table>

**Check List:**

- [ ] Apply online at [http://www.mass.gov/edu/gateway](http://www.mass.gov/edu/gateway) any time before graduation for INITIAL License and SEI Endorsement.
- [ ] Print “Step 4 Confirm Application” page OR any form of application confirmation. (Licenses will not be endorsed without some form of application confirmation.)
- [ ] Request a hard copy of transcript from the University Registrar and ensure that it includes the final grades posted for all licensure courses, including practicum and seminar courses. This should be sent to your residence (or picked up) and uploaded to your ELAR account.
- [ ] First License candidates who hold non-NEU degrees should have their non-NEU transcripts (Undergraduate and/or Graduate) sent to their residence and then upload to their ELAR account.
- [ ] Program Director verifies that CAP documents or Internship verification (School Psychology) is on file.
- [ ] Form must be signed and dated by Program Director.*

---

**Student Signature**

I hereby confirm that the student above has completed a state approved educator licensure program at the level indicated.

Massachusetts Board of Registration of Psychologists Criteria for Advanced Practica

Advanced Fieldwork hours may meet the Massachusetts Board of Registration of Psychologists criteria for Advanced Practica so long as the Board’s requirements are met. Students should familiarize themselves with all of the Board’s requirements for licensure. The following text is particularly relevant to Advanced Practicum: [http://www.mass.gov/ocabr/licensee/dpl-boards/py/regulations/rules-and-regs/251-cmr-300.html#3.04](http://www.mass.gov/ocabr/licensee/dpl-boards/py/regulations/rules-and-regs/251-cmr-300.html#3.04).

3.04: Professional Experience Requirements

(1) All of the requirements of 251 CMR 3.04 must be satisfied in order to meet the application for licensure requirements under M.G.L. c. 112, § 119.

(2) Each training experience must be for a period of not less than four months for a minimum of 16 hours per week during which the applicant received no less than one hour of individual supervision per week.

(3) Experience will be credited at a maximum of 16 hours for each hour of acceptable supervision of work involving regularly scheduled, face to face, individual supervision with the specific intent of overseeing the services rendered by the trainee, as further described in 251 CMR 3.05.

(4) Experience may not be credited until the applicant has completed two full-time academic years of graduate training in psychology or its equivalent.

(5) The two years of supervised experience, as used in M.G.L. c. 112, § 119 shall mean not less than 3200 clock hours, which have been completed within 60 consecutive calendar months, unless the Board, for good cause, determines that additional time is warranted for completing the 3200 clock hours.

(6) Supervised clinical experience must be completed in positions designated as "psychologist in training" (e.g., intern, resident, fellow, psychology trainee, etc.).

(7) Advanced Practica.

(a) Advanced practica shall be acceptable only after the student has completed a minimum of two full-time, post-bachelor's academic years of graduate education in psychology, at least one year of which is completed in the degree-granting doctoral program.

(b) The student must provide services that are within the scope of the education received in the doctoral program.

(c) There must be a written training plan among the student, the advanced practicum training site, and the graduate training program. The training plan for each advanced practicum experience shall describe how the trainee's time is allotted and shall assure the quality, breadth, and depth of the training experience through specification of the goals and objectives of the advanced practicum, and the methods of evaluation of the trainee's performance.

(d) Advanced practicum training plans shall also include the nature of supervision, the identities of the supervisors, and the form and frequency of feedback from the agency supervisor to the doctoral training program's faculty.

(e) The advanced practicum training plan shall also provide a rationale for the experience in light of previous academic preparation and previous practicum training, to ensure that the overall advanced practicum experience is organized, sequential, and meets the training needs of the trainee and the protection of the public.
(f) At least 50% of the total hours of supervised experience shall be in service-related activities, defined as treatment/intervention, assessment, interviews, report writing, case presentations, and consultations.

(g) At least 25% of the supervised professional experience shall be face-to-face patient/client contact.

(h) The student must receive a minimum of two hours of individual supervision per week. A minimum of one hour of individual or group supervision must take place for each 16 hours of work. The group size may not exceed three.

3.05: Supervision Requirements
(1) The reference in M.G.L. c. 112, § 119(c) to "under the supervision of . . . a licensed psychologist, or one clearly eligible for licensure" shall not be met unless the applicant has been engaged in a formal relationship with the supervisor which provided frequent and regularly scheduled individual or group contacts with the supervisor.

(2) Supervision.
   (a) Shall be a formal relationship between a qualified supervisor, as provided in 251 CMR 3.05(3) and (4), and a trainee engaged in training.
   (b) Supervision shall occur at least once weekly.
   (c) Face to face contacts shall consist of contacts between the supervisor and the individual trainee or groups of not more than three such persons.
   (d) The supervisor shall assess and constructively criticize the work of the trainee.
   (e) The supervisor shall not be reimbursed by the trainee in whole or part, for the supervision provided.
   (f) The supervisor shall be on the premises where the trainee renders service during the time such service is rendered.

(3) Supervision shall be obtained from a licensed psychologist or one clearly eligible for licensure in the opinion of the Board.
