

Northeastern University PA Program Goals Outcomes:

- **Goal 1: Prepare students who demonstrate cultural humility during interactions with patients, families, and the healthcare team.**

Measurement and Benchmark: On every clinical rotation we collect data on student ability to demonstrate cultural competency during interactions with patients, families, and the healthcare team. Our programmatic benchmark for success in this goal is greater than or equal to 98% of student evaluations demonstrating competence.

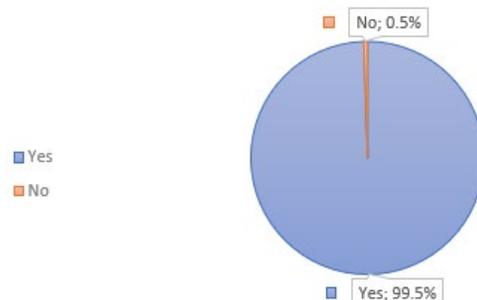

Outcome: Northeastern University PA Students successfully demonstrated cultural humility during interactions with patients, families, and the healthcare team. 100% of student evaluations demonstrated competence during supervised clinical practice experiences (SCPE)/clinical rotations.

- **Goal 2: Prepare students to become effective members of an interprofessional healthcare team.**

Measurement and Benchmark: On every clinical rotation we collect data on student ability to demonstrate competence as an effective member of an interprofessional healthcare team. Our programmatic benchmark for success in this goal is greater than or equal to 98% of student evaluations demonstrating competence.

Outcome: Northeastern University PA Students successfully demonstrated competence as an effective member of an interprofessional healthcare team. 99.5% of student evaluations demonstrated competence during supervised clinical practice experiences (SCPE)/clinical rotations.

▪ **Goal 3: Graduate competent medical practitioners who are in high demand by employers.**

Measurement and Benchmark: We collect data from each graduating class in an End of Program Survey prior to graduation and a Graduate Survey one year after graduation. Our programmatic benchmark for success of this goal is to have 25% or more students with a job offer prior to graduation and 95% of graduates employed* by one year after graduation.

*excludes graduates who choose not to seek employment for personal reasons

Outcome: Northeastern University PA graduates are in high demand by employers. In the graduate survey of the class of 2019, 25% of respondents had a job offer prior to graduation, 71% were employed within the first 3 months after graduation, and 100% were employed by one year after graduation.
