Central Auditory Processing Evaluations
Pre-Appointment Information and Requirements

Before we can schedule your child’s CAP evaluation, it is necessary to have information about your child’s medical and developmental histories, present and past educational history and information/observations about your child from both the home and school environment. The enclosed parent questionnaire and teacher checklist will help us determine if your child will benefit from a CAP evaluation and will help us choose the most appropriate tests for your child.

Please give the classroom teacher the Fisher’s Auditory Problems Checklist and please complete the enclosed Parent Questionnaire. **The parent questionnaire must be received before the appointment date.** If your child has received evaluations from other disciplines please forward copies of those as well. Educational assessments, speech-language evaluations, psychologic or neuropsychological evaluations, and any IEPs currently in place should be included.

Please send the above to:

Audiology
Northeastern University
Speech- Language and Hearing center,
503, Behrakis Health Sciences Center,
30 Leon Street, Boston, MA 02115.

Fax : 617-373-8756.

Hearing status is an important consideration in auditory processing. Your child will receive an audiologic evaluation as part of the CAP evaluation process. If your child has had a very recent, complete, audiologic evaluation, you may forward a copy to the Audiology department to determine if it is sufficient. Screening tests will not be accepted.

Please contact Audiology with any questions at 617-373-2492.
