TEACHING & ADVISING

PA6200: Anatomy & Physiology I w/ Cadaver Lab, Northeastern University

Course Director, Instructor (Fall 2023 – Present)

PA6200 is the first course in a two-semester graduate survey series covering: Cellular biology, hematologic, immunologic, cardiovascular, and pulmonary physiology. Cadaver laboratory lectures and guided dissection sessions cover the anterior chest wall and thorax, with focus on the pulmonary and cardiovascular systems.

PA6203: Physical Diagnosis and Patient Evaluation I: Small Group + Labs, Northeastern University

Instructor (Fall 2023 – Present)

Presents the techniques for eliciting an accurate history, performing an appropriate physical examination, making case presentations, and documenting patient information. Issues such as effective communication, confidentiality, cultural competence, and dealing with patients who are terminally ill or disabled are included. Emphasizes skill development. Small group sessions focus on development of clinical decision making and clinical reasoning skills.

PA6327: Emergency Medicine & Critical Care

Guest Lecturer (2020)

Part-Time Lecturer (2021-2022)

Instructor (Summer 2023 – Present)

Presents the principles of life-support techniques. Focuses on the initial management of acute medical and traumatic conditions in hospital and prehospital situations. Instructs students in basic cardiopulmonary resuscitation techniques including BLS and ACLS. Includes such topics as airway management, hemodynamic monitoring and management, dysrhythmia recognition and treatment, cardiac arrest, hypovolemic states and management, invasive procedures, multiorgan system failure, nutritional support, and metabolic management of the ICU patient.
